**Who should take it:** Excellent buoyancy control is what defines skilled scuba divers. You've seen them underwater. They glide effortlessly, use less air and ascend, descend or hover almost as if by thought. They more easily observe aquatic life without disturbing their surroundings. You can achieve this, too. The PADI Peak Performance Buoyancy Specialty course improves the buoyancy skills you learned as a new diver and elevates them to the next level.

*This course includes the academics portion of the PPB certification process. You may complete the required certification dives during your next dive trip (within 12 months).*

### **Course conducted at:**
